SambaSafety Package Overview

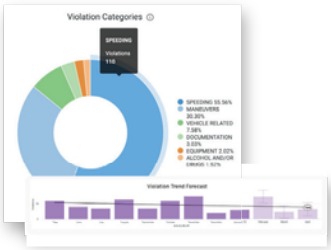

CLOUD-BASED DRIVER RISK MANAGEMENT SOLUTIONS TO FIT YOUR NEEDS

Whether you're simply looking to replace manual MVR pulls with continuous monitoring, or you need an advanced solution to intervene with at-risk drivers using targeted online training, you'll find a SambaSafety package to fit your company's unique needs. Each package is designed to provide a comprehensive, seamless and flexible set of capabilities to help your business navigate driving risk.

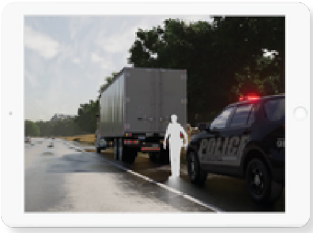

ESSENTIALS

Provides continuous monitoring of Motor Vehicle Record (MVR) violations, license status changes and CSA inspections. Streamline driver enrollment, place drivers into default risk categories and receive alerts for new activity to better mitigate driving risks. Includes alerts, reports, standard scoring and workflow capabilities.

PROFESSIONAL

Includes everything offered in Essentials, plus advanced analytics, configurable scoring and API capabilities, allowing you to leverage dashboards and visualizations to identify trends, detect changes to a driver's record, benchmark drivers and make data-driven decisions.

ULTIMATE

A comprehensive plan offering everything under Professional, plus integrated online training with AI-driven training recommendations tailored to specific alerts. Identify, manage and take action on risk in one platform with monitoring, alerts, configurable scoring, advanced analytics, API capabilities and robust online training.

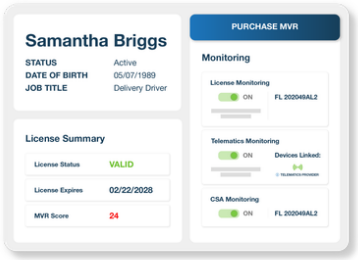

A SINGLE PLATFORM TO MITIGATE DRIVER RISK

Take Risk Management to the Next Level

sambasafety

COMPLETE

Our most comprehensive package offering everything under Ultimate, plus near real-time telematics integration and access to SambaSafety's University Complete training library, spanning all content categories plus specialized topics like Hazmat, OSHA and food safety. Combine license, CSA, and telematics monitoring for a unified view of risk, intervene on alerts with integrated training workflows, and analyze trends with insight dashboards and benchmarking, all from a single connected platform.

TELEMATICS

Provides integration with leading telematics providers for a centralized, normalized view of real-time mobility risk. Includes continuous monitoring for high-risk driving behaviors, comprehensive risk scoring, alerts, reports and workflow capabilities. May be added to existing modules or purchased as a stand-alone solution.
